

How to activate license online?

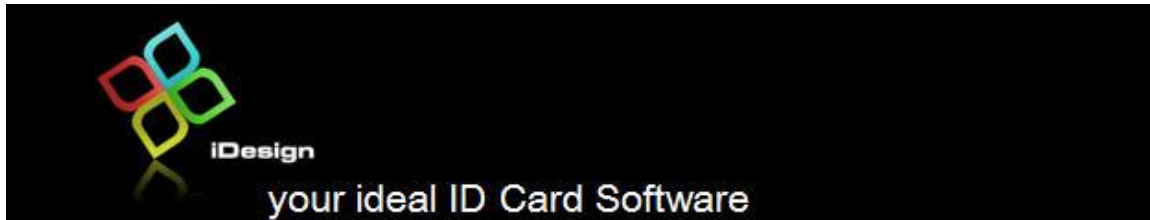

If you have yet to activate the software serial number for iDesign, each time you launch the software, the system will display the following screen when start up the software.

A screenshot of a 'Software Activation' dialog box. The window title is 'Software Activation'. It contains a 'Machine code' field with the value '68C22867802B33124CE32E62DF402A588AD5A8A86EDA85C4E320D157563DB86D'. Below this is a 'Serial Number' field with four empty boxes separated by dashes. There are two buttons: 'Online Activate' and 'Run As Demo'. A checkbox labeled 'Manually Activation/Deactivation' is present. Below the checkbox is a text box for 'Registration Licence No:'. At the bottom, there are two buttons: 'Generate Activation File' and 'Offline Activate'. A small text block provides instructions: 'Click "Generate file" to create a SM.txt at desktop and email/fax it to your vendor. For "Activation", you will receive the Registration Licence No from your vendor. Copy and paste the 20 alphanumeric string into the below box before click on "Offline Activate".'

To run in demo mode, click **Run As Demo** button if you would like to run in trial mode before proceed to buy the license. You have the full function except that you are not allowed to save the template as well as having a little print text on every card you printed. There is no expiry date for the demo version.

If you have the software serial number ready and would like to perform online activation, you just need to fill up the 16 characters and click **Online Activate** button.

You are ready to use the software now!

How to activate license manually?

- 1) Check on the box **Manually Activation/Deactivation**

The screenshot shows a window titled "Software Activation". It contains several fields and buttons. The "Machine code" field is filled with a long alphanumeric string. The "Serial Number" field is filled with "FNPL - HBJX - QDVJ - UFGF". There are two buttons: "Online Activate" and "Run As Demo". A checkbox labeled "Manually Activation/Deactivation" is checked. Below this, there is a paragraph of instructions: "Click 'Generate file' to create a SM.txt at desktop and email/fax it to your vendor. For 'Activation', you will receive the Registration Licence No from your vendor. Copy and paste the 20 alphanumeric string into the below box before click on 'Offline Activate'." The "Registration Licence No" field is filled with "FACCBBD315V0C54F5986". At the bottom, there are two buttons: "Generate Activation File" and "Offline Activate".

box.

- 2) Key in serial number, then click **Generate Activation File** button to create a SM.txt at desktop, email/fax it to your vendor and your vendor will provide you in return the registration licence number.
- 3) Once you received the Registration Licence Number from vendor, following the above Step 1 and 2 before entering the return Registration Licence Number and click "Offline Activate" button to activate the software.

You are ready to use the software now!
