your ideal ID Card Software

How to add QRcode?

To add QR to your template, click on QRcode tool, move your pointer to the card work area where you want to place the bar code, and click on the card work area.

A QRcode object will appear on the template. Right click and select Properties to change all properties like fixed text(eg: http://www.idesign.sg) or link to database source for variable data.

Click on **Apply** button to save changes or **OK/Cancel** button to quit this screen
