

iDesign Software Update

Date	Wednesday, 11 February 2009
Subject	iDesign Software Fixes and Enhancements

The purpose of this Update is to announce an update to the iDesign Card Software. Refer to the earlier update note on new features for v5.x.

Please refer to below table for version details.

Version	Corrected Problems
5.1.2.8	<ul style="list-style-type: none"> - Display all pull down menu when open a template. - Refresh the data within a csv/xls file after some data update from another source by clicking on Database button and re-select the data sheet again. - Change "Cad Front" to "Card Front" in the English resources file.
5.1.2.9	Fixed the global counter issue for fixed template.

The latest new release either for demo or retail version, both is available for download at www.idesign.sg/downloads/idesign5.1/setup.exe

If you have any questions, please contact me at hweelee@idesign.sg or Main: +65 62882112 or DID: 6307 9379.

Thanks.

Regards
