

iDesign Software Update

Date	Monday, 17 August 2009
Subject	iDesign Software Fixes and Enhancements

The purpose of this Update is to announce an update to the iDesign Card Software. Refer to the earlier update note on new features for v5.x.

Please refer to below table for version details.

Version	Corrected Problems
5.1.3.0	- Global Counter to allow decrement value. - Enables data filtering function for Xpress Version
5.1.3.1	- Incorporate new feature, Shrink to Fit
5.1.3.2	- Incorporate new feature, substring function to extract part of the data from a database field with new guide update
5.1.3.3	- reset global counter for zero value if use with decrement value
5.1.3.4	- include new help file with the packaging including the guide
5.1.3.5	- Fixes for dual side printing for monochrome printing

The latest new release either for demo or retail version, both is available for download at www.idesign.sg/downloads/idesign5.1/setup.exe

If you have any questions, please contact me at hweelee@idesign.sg or Main: +65 62882112 or DID: 6307 9379.

Thanks.
